

Solar Schools Education Program

Bring Solar Energy Into Your Classroom!

The NYC Solar Schools Education Program is hosted by the DOE Office of Sustainability and is delivered in partnership with Solar One.

This Program is FREE for grades 3-12 DOE teachers, offers CTLE credits, materials, and is delivered virtually.

A solar installation at your school is **NOT** required in order to participate in this Program.

Program participants must attend:

10 hours of virtual Professional Learning Workshops

Workshops are delivered in multiple shorter sessions and are offered during the school day, afterschool, or on weekends to accommodate a variety of schedules.

Program Benefits:

- **Interactive activities** and **virtual lesson plans** that align with the new Science Scope & Sequence, Regents exams, and Amplify curriculum.
- Strategies for incorporating climate change and renewable energy content into curriculum.
- **Free classroom materials** including multimeters, mini solar panels, and circuit supplies after completing all 10 program hours.
- An opportunity to apply for virtual 1-on-1 lesson planning and co-teaching with a Solar One Educator (limited availability).
- **Best practices** from a community of teachers leading sustainability education in NYC schools!

"I thought that this was sincerely one of the most useful and relevant PD's I've ever been to."

"Offered so many ideas that I can implement immediately in my classes."
